

The Parkl Platform

Connecting people and infrastructure through seamless mobility solutions

This is Parkl

Redefining how Mobility works for Businesses and People

Parkl Hardware

Smart chargers, access points and IoT units linking the physical and digital infrastructure.

Parkl Services

Cloud-based systems for energy, access and data management — enabling automation, integration and scalability.

Parkl Platforms

Intuitive tools that make mobility management effortless for companies, operators and end-users alike.

Parkl builds the digital foundation for urban and corporate mobility — connecting infrastructure, data and people through one seamless platform.

Parkl Hardware

EV Charging

All-round EV charging infrastructure setup and operation.

Energy Control

Load balancing and remote system management.

Parking Management

Smart access control and license plate recognition for office buildings and complexes.

Parkl Services

BMS and API integrations

Seamless connection with Building Management Systems and third-party applications.

Office Charging

Public Charging

Roaming Charging

Home Charging

Office Parking

Off-Street Parking

Public Parking

And many more...

Parkl Platforms

Parkl Mobile App

Intuitive mobile app for daily EV charging, parking and payment — all in one place.

Parkl Mobility Manager

Company dashboard for real-time usage monitoring, user management and transaction handling.

From Building Blocks to Tailored Solutions

Parkl combines its hardware, services and platforms into dedicated mobility solutions — each designed for the needs of a specific partner type.

Real Estate Companies

Owners and operators managing energy, charging infrastructure and parking across office buildings, business parks and mixed-use properties.

Corporations

Organizations optimizing employee mobility and fleet operations through integrated charging, parking and admin tools.

Industrial & Logistics

Factories and industrial sites connecting fleet, workforce and energy infrastructure within one unified platform.

Scalable EV Charging Infrastructure for Industrial & Logistics Companies

- Streamlined fleet and employee charging solutions
- Optimized energy usage and charger allocation
- Automated billing workflows
- ESG-focused energy and sustainability tools
- Enhanced safety, reliability and operational control

EV Charging

All-round EV charging infrastructure setup and operation.

Energy Control

Load balancing and remote system management.

BMS and API

Seamless connection with Building Management Systems and third-party applications.

Office Charging

Workplace EV charging with pre-determined user groups, customizable billing and charger booking.

Public Charging

Access to 150 000+ roaming charging points across Europe through Parkl app.

Mobile App

Intuitive mobile app for daily charging, parking and payment — all in one place.

Mobility Manager

Company dashboard for real-time usage monitoring, user management and transaction handling.

BMW Plant Debrecen: The largest EV charger project in the CEE region

Industrial & Logistics Company use case

300+

Charging points

1500+

Daily users

Client's Needs

- Scalable EV charging infrastructure for a large company fleet with 1,500+ daily users
- Management of multiple user groups (e.g. private, pool, company vehicles)
- Mix of private-use and publicly accessible chargers
- Full-scope electrical installation and ongoing operational support

Parkl's solution

- Installed 300 AC and 2 DC chargers for BMW's corporate fleet
- Enabled customized charging user groups for different vehicle categories
- Delivered complete electrical infrastructure, including cabling, distribution cabinets and DLM
- Ensured reliable coverage of all fleet charging needs, both on-site and in public areas
- Enabled public charging solutions for employees on a regional level via roaming charging with Parkl app

Smart mobility infrastructure for Real Estate Companies

- Streamlined digital parking & EV charging
- Increased space utilisation & optimized electric capacity
- Seamless operations and billing
- ESG-focused energy and sustainability tools
- Improved safety and user transparency

Parking Management

Smart access control and license plate recognition for office buildings and complexes.

EV Charging

All-round EV charging infrastructure setup and operation.

Energy Control

Load balancing and remote system management.

BMS and API

Seamless connection with Building Management Systems and third-party applications.

Off-Street Parking

Dedicated parking zone for utilizing the available capacities by opening it to public users.

Public Charging

Public chargers for extra profit, enabling public users and tenants to use chargers on demand.

Mobile App

Intuitive mobile app for daily charging, parking and payment — all in one place.

Mobility Manager

Company dashboard for real-time usage monitoring, user management and transaction handling.

MOL Campus: CEE's flagship business tower

Real Estate Company use case

1000+

Parking spaces

1500+

Users

Client's Needs

- Reliable parking system for 1,000+ parking spaces and 10 gates
- Smooth performance during peak hours (15+ vehicles/minute/gate)
- Custom access rules and flexible usage for 1500+ users
- Seamless integration into the building ecosystem

Parkl's solution

- Tailored Parkl Office system on Microsoft Azure
- Dynamic parking space allocation and reservation features
- Guest, poolcar, and zone-based parking management
- Camera and sensor-based occupancy detection
- Adaptive barrier direction for traffic optimization

All-round mobility solutions for Corporations

- In-app payment and smart billing
- Real-time tracking of transactions
- Intuitive, customizable booking system
- Automated processes and reporting workflows
- Exceptional user experience

Office Parking

Smart booking and access control for office garages — ensuring flexible and fair usage for employees.

Public Parking

Seamless connection with public Parkl locations and on-street parking, allowing users to park anywhere with one account.

Office Charging

Workplace EV charging with pre-determined user groups, customizable billing and charger booking.

Public Charging

Access to 150 000+ roaming charging points across Europe through the Parkl app.

Home Charging

Manage home and workplace charging from a single interface, with unified statistics and billing.

Mobile App

Intuitive mobile app for daily charging, parking and payment — all in one place.

Mobility Manager

Company dashboard for real-time usage monitoring, user management and transaction handling.

MILLENNIUM

Henkel: Full-scale corporate mobility in one system

Large Corporation use case

2500+

Monthly fleet
transactions

250+

Users

Client's Needs

- Optimal use of limited office parking capacities
- Integrated e-mobility solutions in the office building
- Public EV charging and parking with access management
- Centralized, effortless mobility administration

Parkl's solution

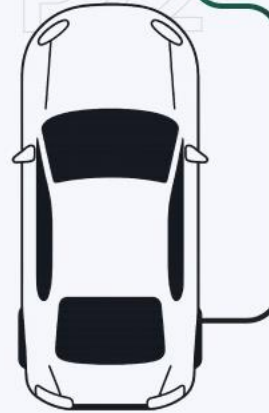

- Smart, shared parking space allocation with multiple locations
- Poolcar and guest management
- Dedicated EV chargers installed and operated by Parkl
- Seamless fleet parking solution and charging on 100,000+ charging points across Europe
- Unified platform with full admin control

Colleague with reservation

Pre-booked position with or without EV charger.

Executive with dedicated position

Entry and exit without limitations, available OOO feature. With or without dedicated EV charger.

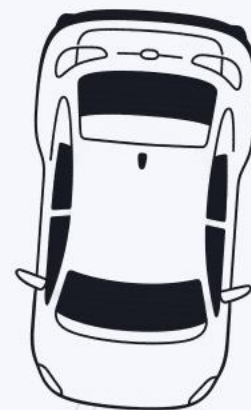

Colleague Without reservation

Random allocation when entering the garage.

Pool car with dedicated position

Entry and exit without limitations,
shared and accessed flexibly. With or
without dedicated EV charger.

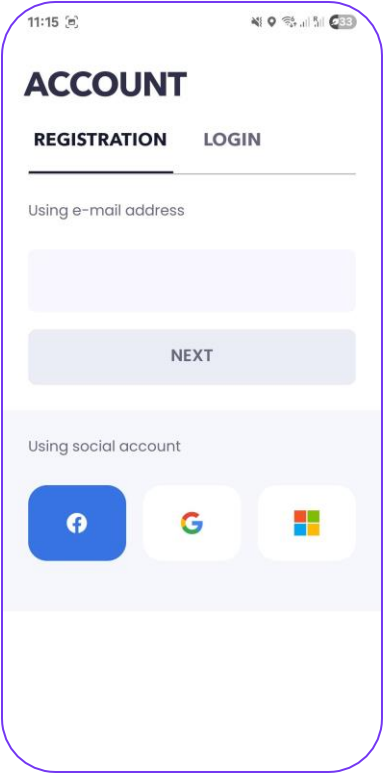

Motorbike with or without reservation

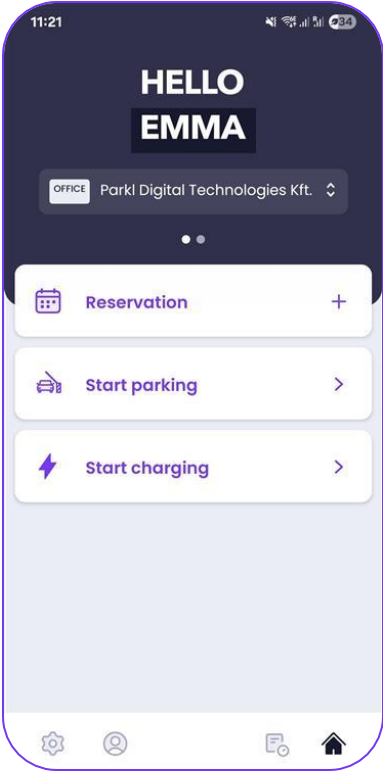

Pre-determined motorbike
positions.

Guest

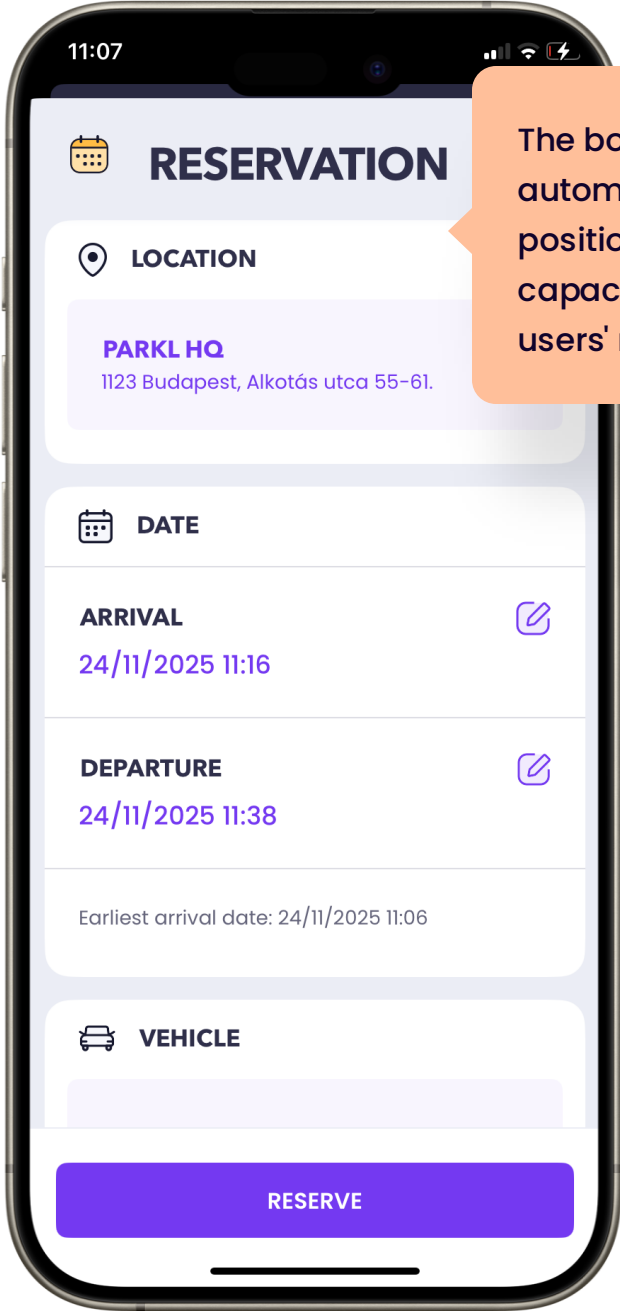

Entry and exit without
limitations. With or without
dedicated EV charger.
